## Two-way Attacking Midfielder (8/10 hybrid)

### ⚽ Offensive

- Not a high box presser / scorer
- Chance creation > finishing
- Attacks space with the ball, not mainly with off-ball runs
- Shoots, but not from prime zones

### 🎯 Passing profile

- Vertical-minded passer
- Looks to play between lines, not recycle
- More “progression” than “control”
- Not a winger-cross profile
- Not a deep playmaker

### ⚡ Dribbling

- Willing to engage defenders
- Not elite efficiency yet (normal at 16)
- Uses dribbling to break lines, not isolate fullbacks

### 🛡️ Defensive

- VERY active defensively for an AM
- High counter-press involvement
- Disciplined aggression
- Comfortable defending forward, not deep block only

### 🧠 Strengths

- Defensive contribution & pressing intelligence
- Vertical mindset with ball (progression, not safety)
- Courage to receive & dribble centrally

### 🚀 Development

- Decision-making after first line break (pass vs carry)
- Shot selection (quality over quantity)
- Maintain balance and stability in duels

### ⭐ Conclusion

High-energy, two-way attacking midfielder who contributes strongly to pressing and ball progression, acting as a connector rather than a classic playmaker.
